

A new user specific setting has been added that will allow you to override all hyperlinks within HeroTill to open in the current window.

This setting can be located by clicking on My Account > scroll down to Application Settings > Force Open all Hyperlinks in the current Window – set to ON or OFF.

Radius • Hotspots • Workflow • Devices • Sales • Billing • Reports • Tools • Setup • ?

Application Settings

Default List Size 10
Default number of rows to display on list screens

Enable Helpdesk Ticket Hover ON
Turn this switch off to disable the helpdesk menu auto dropdown on hover.
Disabling this setting will require you to click on a helpdesk ticket menu before the dropdown appears

Force Open all Hyperlinks in the current Window OFF
When enabled all the hyperlinks in DataTill will open in the current window

Care must be taken when opening links on a page that is busy processing data, as the current session will be overwritten
