

## Radius name change to Data (Big changes as a result of FUP).

The Radius menu option within HeroTill has been given a makeover, with the recent addition of the FUP module.

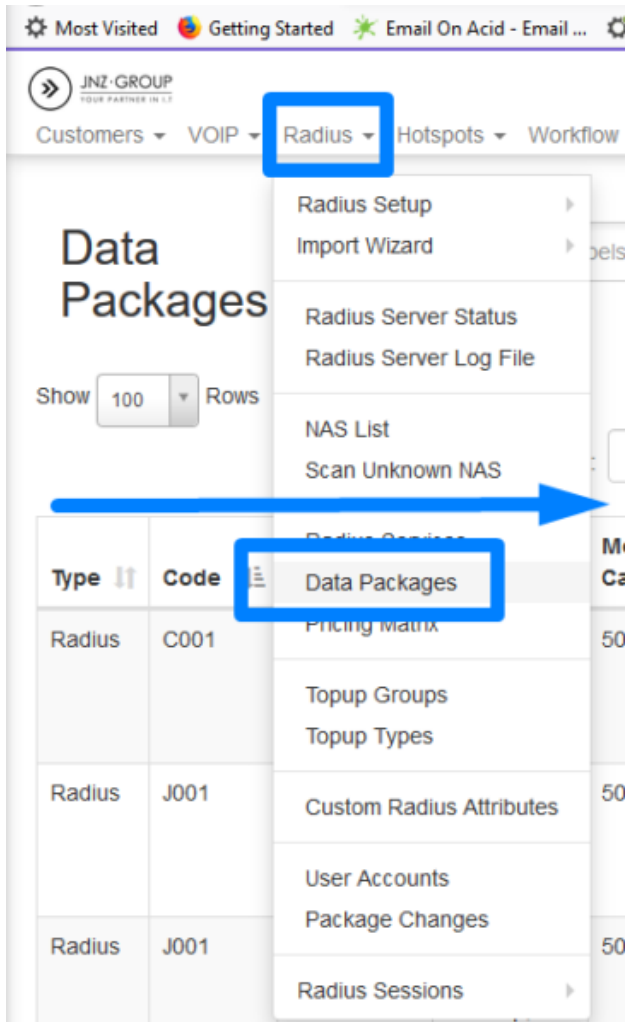

Radius is now referred to as *Data* on the home page. The subsequent dropdown items to the *Data* menu have also been changed. Refer to the summary below for a list of menu item changes.

- A new *Fair Usage Policies* menu item has been added to the *Data* dropdown list. This includes the sub menus *Speed Limit Policies* and *Speed Boost Policies*.

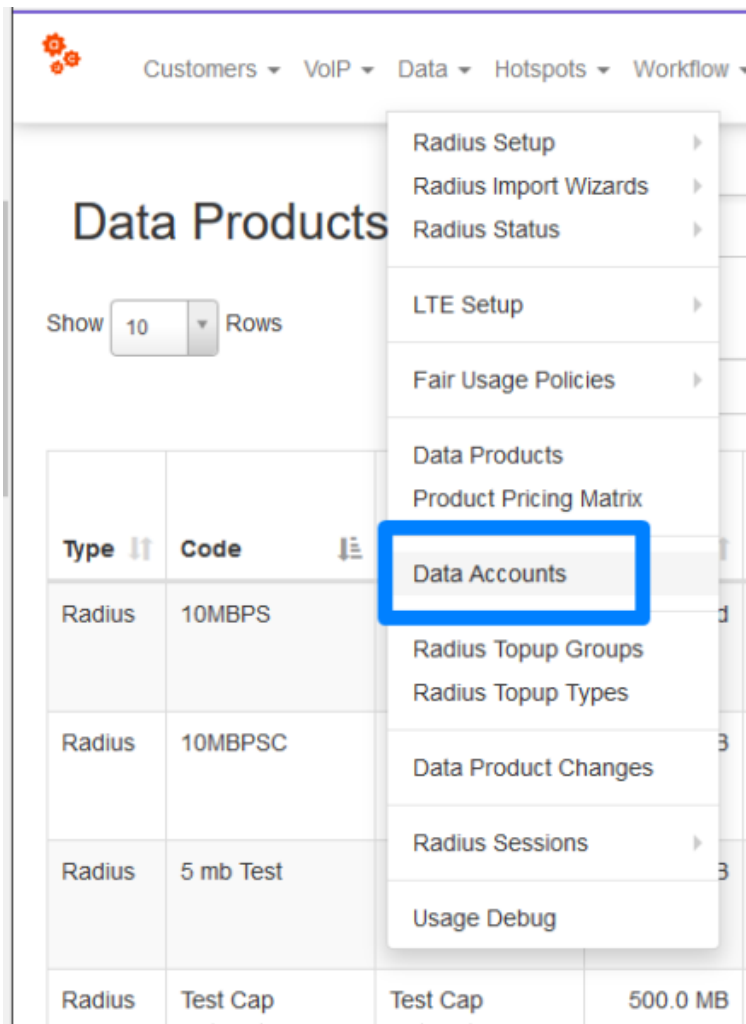

- The Data Packages menu option now appears as *Data Products*. Any previous instance

where Data Package was referenced – is now renamed/referred to as *Data Products*.

The screenshot shows the Herotel web interface. At the top, there is a navigation bar with links: 'Most Visited', 'Getting Started', and 'Email On Acid - Email ...'. Below this is a header with the 'JNZ GROUP' logo and the tagline 'YOUR PARTNER IN IT'. The main navigation menu includes 'Customers', 'VOIP', 'Radius', 'Hotspots', and 'Workflow'. The 'Radius' menu is expanded, showing a list of options: 'Radius Setup', 'Import Wizard', 'Radius Server Status', 'Radius Server Log File', 'NAS List', 'Scan Unknown NAS', 'Data Packages', 'Pricing Matrix', 'Topup Groups', 'Topup Types', 'Custom Radius Attributes', 'User Accounts', 'Package Changes', and 'Radius Sessions'. A blue box highlights the 'Radius' menu item, and another blue box highlights the 'Data Packages' option. A blue arrow points from the 'Data Packages' option to the 'Data Packages' section of the main content area. The main content area is titled 'Data Packages' and includes a 'Show 100 Rows' dropdown. Below this is a table with columns 'Type', 'Code', and 'Ca'.

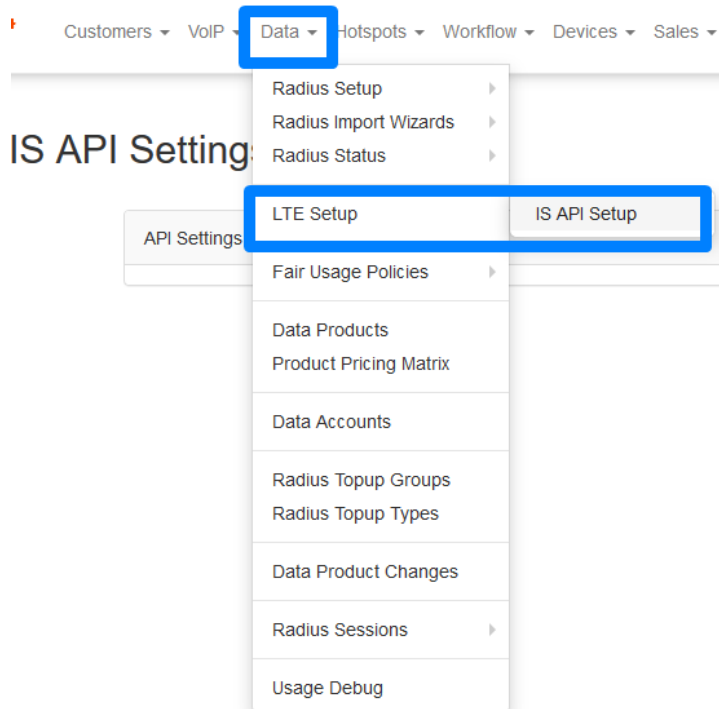

Type	Code	Ca
Radius	C001	50
Radius	J001	50
Radius	J001	50

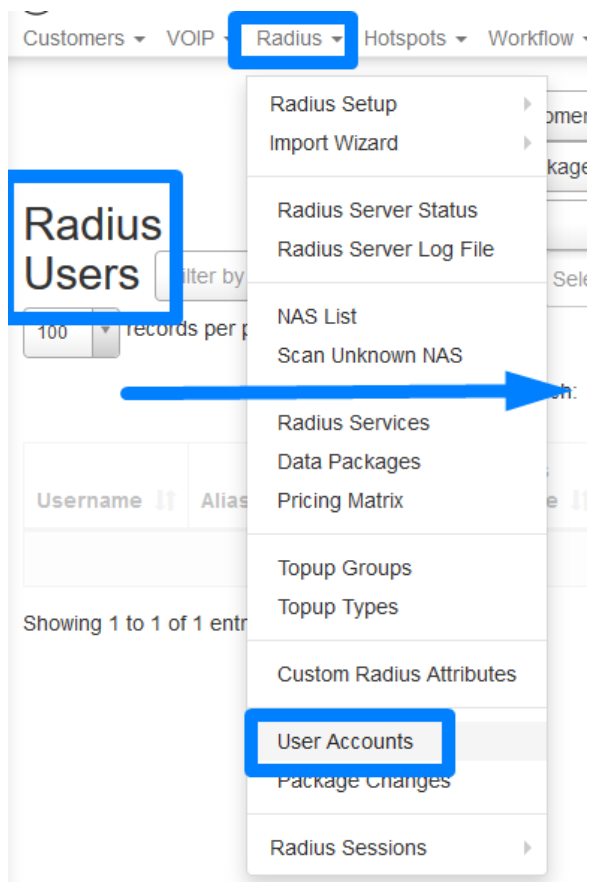

The screenshot shows the Herotel web interface. At the top, there is a navigation bar with a gear icon and several dropdown menus: Customers, VoIP, Data, Hotspots, and Workflow. The 'Data' menu is currently open, displaying a list of options: Radius Setup, Radius Import Wizards, Radius Status, LTE Setup, Fair Usage Policies, Data Products, Product Pricing Matrix, Data Accounts (highlighted with a blue box), Radius Topup Groups, Radius Topup Types, Data Product Changes, Radius Sessions, and Usage Debug. Below the navigation bar, the main heading is 'Data Products'. Under this heading, there is a 'Show 10 Rows' control. A table is displayed with columns 'Type' and 'Code'. The table contains four rows of data:

Type	Code
Radius	10MBPS
Radius	10MBPSC
Radius	5 mb Test
Radius	Test Cap

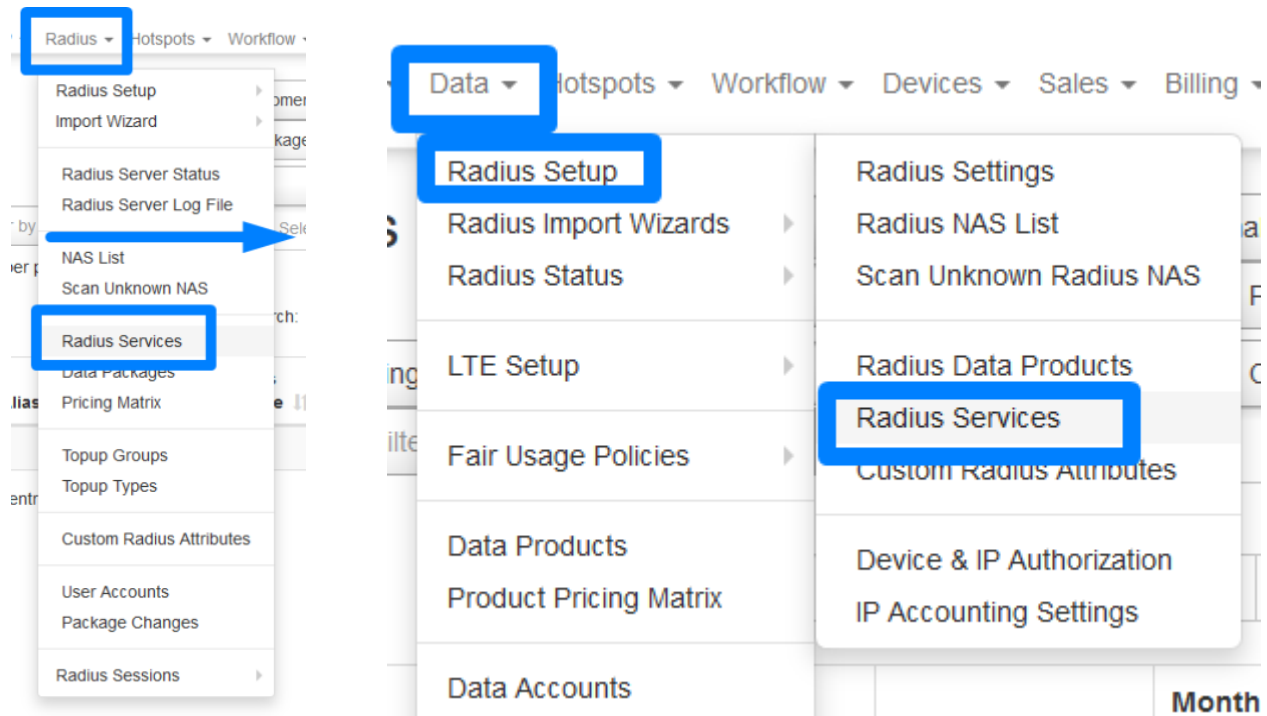

- All Data Products are now listed under the *Data* menu, including LTE. In the screenshots below the user can now see LTE has it's own setup.

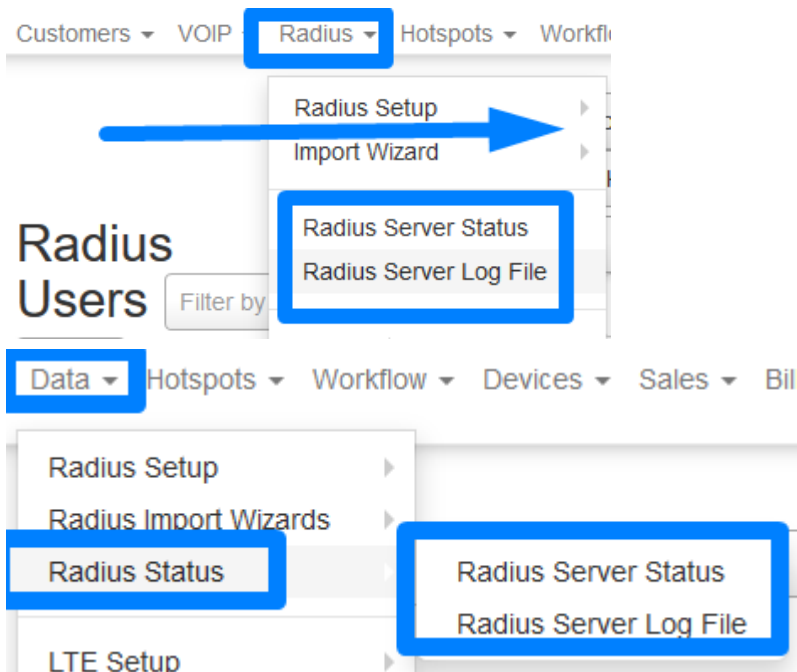

- The (Radius) User Accounts menu item has now been renamed to *Data Accounts*. Any previous instance where User Accounts was referenced- is now renamed/referred to as *Data Accounts*.

- The Radius Services menu item has been moved the Radius Setup sub menu (under the *Data* tab).
- The NAS List menu item has also been moved to this location and has been renamed to *Radius NAS List*.
- The Custom Radius Attributes menu item has also been moved to this location.
- The Scan Unknown Radius NAS menu item has also been moved to this location.
- The Radius Data Products menu item can also be found here (listed as Data Products on the main menu dropdown list).

- A new menu dropdown has been added to the *Data* menu. This is the *Radius Status* menu item - the sub menus are Radius Server Status and Radius Server Log File. These 2 items previously displayed under the main menu dropdown list.

- The Pricing Matrix menu item has been renamed to *Product Pricing Matrix*.
- Topup Groups and Topup Types have been renamed to *Radius Topup Groups* and *Radius Topup Types*.
- Package Changes have been renamed to *Data Product Changes*.
