

Tired of remembering passwords for your accounts across the internet? You can log in with your social media accounts on HeroTill.

This feature works for admin users and for customers on the customer portal.

How to link your HeroTill account with a social media account:

Go to “My Account” at the top right corner of the screen.

Then scroll down to “Link an existing Social Media Account to your DataTill account for easy login”

Click on the social media buttons to add an account to link.

After you have linked a social media account with your HeroTill system account, the social media login is a one click login. (No need to type in passwords again.)

Sign in page with social media logins enabled:

Sign In with your DataTill Development Account
