

Static Search

Application Settings

Default List Size

Default number of rows to display on list screens

Enable Helpdesk Ticket Hover ON

Turn this switch off to disable the helpdesk menu auto dropdown on hover.
Disabling this setting will require you to click on a helpdesk ticket menu before the dropdown appears

Force Open all Hyperlinks in the current Window OFF

When enabled all the hyperlinks in DataTill will open in the current window

Care must be taken when opening links on a page that is busy processing data, as the current session will be overwritten

Table Static Search ON

Turn this switch off to disable static table searching.

A Static Search function was added to prevent pages from loading incomplete searches. Users would need to press enter or click search. This affects all pages with the search functionality.

A switch has been included to enable / disable this functionality.

Default setting: enabled

Setting type: Linked to individual admin user setting

URL: https://{ Company name }.com/users/show_admin_account_info

Version 1.4.00.01
